

### Mini beasts

Get outside and explore. How many different minibeasts can you spot? Where did you spot them? In your garden create your very own bug hotel like the one below. Check it out at different times to see who comes to stay! Cardboard tubes, paper, twigs, foliage will all help to create your living space. Take photos and add to tapestry!

### Reception

#### Summer 1

### Optional home learning opportunities

### My favourite animal

Think about your favourite animal and create a poster or information booklet full of wonderful facts and illustrations. Your local library can help to answer any questions you might have about your chosen animal. How many different story books can you spot your chosen animal? Bring your info to share with friends in school!

### Create a rainbow plate

Think about all of the different fruit and vegetables you like to eat. Why not write a shopping list and head out to the shops. You might like to make a salad or a fruit kebab? How many different colours of the rainbow can you eat? Can you try something brand new? Don't forget to take a photo of your colourful plate for everyone to see on tapestry. Write the ingredients and recipe to share with others in school.

### In the garden

Head outside and look at the different plants and flowers growing. Why don't you ask your parents if you can help to grow something new? Head out to the garden centre to buy a packet of seeds, follow the instructions and see what happens. Will you plant in to a raised bed, a pot or somewhere new? Are you going to experiment with different places to plant your seeds? Did you know old wellies work really well!
